Manager, Business Services

Subject: SFPUC FY 2022-23 Third Quarter Budgetary Report

through March 2023

The FY 2022-23 third quarter budgetary reports are attached for the three Enterprises and CleanPowerSF, with high-level changes to revenues and expenses summarized in the following table:

FY 2022-23 Operations

	Beginning Available Fund Balance	Fund Balance Budgeted to be (Used)	Projected Sources	Projected Uses (excluding Capital)	Net Operating Results Surplus / (Shortfall)	Mid-year Adjustments to Fund Balance	Projected Year End Available Fund Balance
Water	244.7	(67.9)	12.6	15.2	27.8	-	204.5
Wastewater	158.4	(25.1)	(0.2)	20.0	19.7	-	153.1
Power	136.7	-	48.4	1.2	49.6	-	186.3
CleanPowerSF	51.3	-	10.2	4.0	14.3	-	65.5

Summary:

- Positive year end operating results projected for Water, Wastewater, Power, and CleanPowerSF as of Q3.
- Water: Revenues are projected to exceed budget due to higher than
 expected wholesale sales, because of lower than expected
 conservation efforts. Retail projections are below budget and lower
 compared to Q2 due to the removal of the drought surcharge
 effective May 2023.

Dennis J. Herrera General Manager

OUR MISSION: To provide our customers with high-quality, efficient and reliable water, power and sewer services in a manner that values environmental and community interests and sustains the resources entrusted to our care.

- Wastewater: Revenues are projected to be very slightly below budget. This projection has worsened since the last quarterly report due to the removal of the drought surcharge effective May 2023.
- In both Water and Wastewater: Expenditure savings are projected from lower labor costs due to vacant positions, bureau overhead savings and savings in debt service payments.
- Power: Retail sales are projected to be below budget, however, this
 does not reflect unanticipated poor performance. The retail revenue
 budget includes an additional \$15.5M that was not adjusted
 downwards in the budget to match assumptions in the final Power
 Rate Study. The Rate Study was adopted in late May 2022, which
 did not allow time for the FY 2022-23 budget to be adjusted before
 adoption.

Wholesale revenues are projected to significantly exceed the budget due to higher power prices combined with higher generation due to the winter storms.

On the expense side, there is an anticipated shortfall in "pass through" gas and steam costs to other city departments which will be covered via workorder recoveries.

Note that a \$17M budget adjustment was made during Q3 to support higher costs related to the transmission and distribution of power. This is reflected in the revised budget column. Costs related to power purchases are now expected to net a small surplus along with savings from bureau overhead costs.

 CleanPowerSF: Revenues are projected to exceed the budget due to higher sales than anticipated. In addition, labor savings are anticipated due to vacant positions. These are offset a projected shortfall in the power purchase budget driven by a higher market prices.

Note that a \$23.2M increase to the CleanPowerSF power purchase budget was made during Q3 to cover the higher than anticipated power purchase costs (reflected in the revised budget column). Another transfer is anticipated during Q4 to cover the anticipated shortfall for the remainder of the fiscal year.

 All enterprises are projected to meet financial policy minimums and coverage ratios at year end.

If you have questions, please contact me at NHom@sfwater.org.

Appendix A

WATER ENTERPRISE OPERATING FUNDS FY 2022-23 3rd Quarter - Budgetary Basis, Funds 25940, 25950, 25960, 25990, 26570 & 26600 (\$ Millions)

Revenue Variances

- **A.** Retail water sales forecasted to be 53.3 MGD, a 1.4% decrease from budgeted volumes of 54.0 MGD, and a 1.6% increase from prior year actuals of 52.4 MGD. Projections do not include the 5% drought surcharge for the remainder of the year, it was rescinded effective May 2023. Includes adjustment to account for \$1.12M low income discounts for water that were incorrectly allocated to wastewater.
- **B**. Wholesale water sales forecasted to be 121.1 MGD, a 6.5% increase from budgeted volumes of 113.7 MGD, and a 5.7% decrease from prior year actuals of 128.4 MGD.
- **C.** Interest rate of 1.2% is higher compared to budget of 0.5%.
- **D.** Rental income slightly increased from budget due to greater rental revenue than projected through the first nine months of the fiscal year.
- E. Miscellaneous income slightly decreased from budget due to decrease in collection of water service installation charges.

Expenditure Variances

- F. Savings due to vacant positions.
- G. Savings reflect lower spending associated with customer rebate and incentive programs.
- H. Materials & supplies is projected to exceed budget due to Inflationary costs for chemicals.
- I. Savings reflect lower spending associated with bureau allocation.
- **J.** Debt Service variance due to revised repayment commencement of the Westside Recycled Water Project SRF Loan to align with updated construction schedule.

- K. Calculated as Ending Available Fund Balance (including additions to General Reserve) as a percent of Operating Uses plus Facilities Maintenance/Programmatic Uses. SFPUC's Fund Balance Reserve Policy requires this to be within a range of 25-68%.
- L. Calculated as ratio between (a) Total Sources plus Beginning Available Fund Balance plus Capacity Charges, less Operating Uses less Facilities Maintenance/Programmatic, excluding all revenues and expenses related to the 525 Golden Gate COPs, and (b) Debt Service. The Indenture requires this ratio to be a minimum of 1.25 times, and SFPUC's Debt Service Coverage Policy requires this ratio to be a minimum of 1.35 times.
- M. Calculated as ratio between (a) Total Sources plus any appropriated fund balance, plus Capacity Charges, less Operating Uses less Facilities Maintenance/Programmatic, excluding all revenues and expenses related to the 525 Golden Gate COPs, and (b) Debt Service. SFPUC's Debt Service Coverage Policy requires this ratio to be a minimum of 1.10 times

Appendix B

WASTEWATER ENTERPRISE OPERATING FUNDS FY 2022-23 3rd Quarter - Budgetary Basis, Funds 20160, 20170, 20550 (\$ Millions)

Revenue Variances

- **A**. Wastewater retail billable volumes forecasted to be 43.9 MGD, showing a 0.3% decrease from budget of 44.0 MGD and a 2.1% increase from prior year actuals of 43.0 MGD. Projections do not include the 5% drought surcharge for the remainder of the year, since it was rescinded effective May 2023. Includes adjustment to account for \$1.12M low income discounts for water that were incorrectly allocated to wastewater.
- **B.** Interest rate of 1.2% is higher compared to budget of 0.5%.
- C. Miscellaneous income forecasted to slightly increase from budget, primarily due to sale of fixed assets.

Expenditure Variances

- **D**. Salary savings reflect vacant positions.
- **E**. Savings reflect lower spending associated with bureau allocation.
- **F.** Debt service savings mainly due to the postponed issuance of the 2023 Wastewater Revenue Notes due to market conditions and issuance of the 2022B Wastewater Refunding Bonds. In addition, delayed repayment of Oceanside SRF loan due to project scheduling.

- **G.** Calculated as Ending Available Fund Balance (including additions to General Reserve) as a percent of Operating Uses plus Facilities Maintenance/Programmatic Uses. SFPUC's Fund Balance Reserve Policy requires this to be within a range of 25-68%.
- **H.** Calculated as ratio between (a) Total Sources plus Beginning Available Fund Balance plus Capacity Charges, less Operating Uses less Facilities Maintenance/Programmatic (excluding all revenues and expenses related to the 525 Golden Gate COPs), and (b) Debt Service. The Indenture requires this ratio to be a minimum of 1.25 times, and SFPUC's Debt Service Coverage Policy requires this ratio to be a minimum of 1.35 times.
- I. Calculated as ratio between (a) Total Sources plus any appropriated fund balance plus Capacity Charges, less Operating Uses less Facilities Maintenance/Programmatic (excluding all revenues and expenses related to the 525 Golden Gate COPs), and (b) Debt Service. SFPUC's Debt Service Coverage Policy requires this ratio to be a minimum of 1.10 times.

21.58

Current Basis (L) ≥ 1.10

Revenue Variances

- A. Retail sales are slightly above budget, but is offset by \$15.5M in budget that was not adjusted downwards to match assumptions in the final
- B. Wholesale sales are higher than budget mainly due to higher power prices combined with higher generation due to the winter storms.
- C. Due to higher prices in natural gas & steam.
- **D.** Pooled funds year-to-date interest rate of 1.7% is higher than budget set assuming 0.5%.
- E. Miscellaneous income projected to exceed budget primarily due to water sales and installation for service line extension.

Expenditure Variances

- **F.** Transmission and distribution costs are higher than budgeted assumptions. Transmission is \$5M higher and distribution is \$9M higher. Costs are partially offset by \$4M appropriated reserve for power purchase, \$3M in carryforwards and CAISO costs are projected to be lower than Q2. A \$17M transfer from General Reserve was used to support higher power costs in Q3.
- G. Due to higher prices in natural gas & steam.
- H. Savings reflect lower spending associated with bureau allocation.
- I. \$17M in General Reserve was used to support higher power costs as well as higher transmission and distribution costs.

- J. Calculated as Ending Available Fund Balance (including additions to General Reserve) as a percent of Operating Uses plus Facilities Maintenance/Programmatic Uses. SFPUC's Fund Balance Reserve Policy requires this to be within a range of 25-68%.
- K. Calculated as ratio between (a) Total Sources plus Beginning Available Fund Balance, less Operating Uses, less Facilities Maintenance/Programmatic (excluding all revenues and expenses related to the 525 Golden Gate COPs, Natural Gas and Steam and Treasure Island), and (b) Debt Service. The Indenture requires this ratio to be a minimum of 1.25 times, and SFPUC's Debt Service Coverage Policy requires this ratio to be a minimum of 1.35 times.
- L. Calculated as ratio between (a) Total Sources plus any appropriated fund balance, plus Capacity Charges, less Operating Uses less Facilities Maintenance/Programmatic, (excluding all revenues and expenses related to the 525 Golden Gate COPs, Natural Gas and Steam and Treasure Island), and (b) Debt Service. SFPUC's Debt Service Coverage Policy requires this ratio to be a minimum of 1.10 times.

Total Adjustments to Operating Fund Balance	0.7	1.7	11.4	11.4	-
Available Fund Balance as of Fiscal Year-End	51.3				65.5 H

Revenue Variances

A. Revenues slightly higher than budget due to higher winter load, resource adequacy wholesale sales, and refreshed SuperGreen sales assumptions.

19.5%

B. Interest rate is higher than budget.

Available Fund Balance, % of Operating Uses (I) 9

C. Includes \$4.6M in funds from the State via PG&E to implement the Energy Efficiency Community Food Service Program.

Expenditure Variances

- **D.** Salary savings due to vacant positions.
- E. The Power Purchase variance is driven by costs including a contingency for market price volatility and cashflow, and new customer enrollment load growth. A \$23.2M transfer was made from General Reserve to cover higher than anticipated power costs to purchase energy due to a volatile and expensive power market. Another transfer is anticipated during Q4 to cover the anticipated shortfall for the remainder of the fiscal year.
- **F.** General Reserve was intentionally budgeted and planned to go unspent to build reserves. However, a \$23.2M transfer was made to Power Purchases to cover higher than anticipated costs to purchase energy due to volatile and expensive power market.
- G. Includes \$4.6M in funds from the State via PG&E to implement the Energy Efficiency Community Food Service Program.

- H. Available fund balance at fiscal year end is calculated within this report by taking beginning fund balance, less any fund balance budgeted to be used as a source, and adding the projected variances as well as project closeouts. As the CleanPowerSF Trust Fund is a continuing fund, amounts budgeted therein will automatically roll forward to the following year and will not be closed out to fund balance. As such, variances related to revenues, purchase of power, and general reserves will not close out to fund balance at the end of the year without manual intervention. However as those funds are not considered restricted and CleanPowerSF may choose to close them out to fund balance, we are presenting them here as part of fund balance.
- I. Calculated as Ending Available Fund Balance as a percent of Operating Uses plus Facilities Maintenance/Programmatic Uses. SFPUC's Fund Balance Reserve Policy requires this to be at least 50% within three years of policy adoption (April of 2022).
